

Responsible Behaviour Plan for Students

James Nash State High School has developed this Responsible Behaviour Plan for Students and has implemented procedures for a whole-school approach to instilling responsible behaviour in a supportive, safe, calm and disciplined school environment. School community members have participated in this development and implementation. The plan reflects the shared values and high expectations of Education Queensland's Code of Behaviour, Gympie State Schools Alliance and James Nash S.H.S.

The plan includes:

- a profile of the school community
- a clearly articulated and agreed code of behaviour based on the values of Respect, Responsibility, Honesty/Integrity, Excellence, Safety, and Equity/Fairness for all members of the school community.
- procedures for upholding the code, and for the applying of fair and non-violent consequences for infringement of the code, ranging from the least intrusive sanctions to the most stringent step of exclusion (considered only when all other approaches have been exhausted or rejected)
- the roles, rights and responsibilities of all school community members
- procedures for documenting and managing instances of truancy, harassment, violence, suspected abuse or neglect and drug related matters, in compliance with relevant legislation and departmental policies

This plan will be published and is available to all members of the school community on the School's website or can be accessed from the Administration Office.
